

Lab 7

Q.1 Consider a Hostel Management System. There are three different users: Rector, Employee and Student. When a user logs in, according to his/her role, he/she should be redirected to their respective home page.

Code:

Index.php:

```
<?php
    if(isset($_POST["submit"])){
        if($_POST["username"] == "admin" && $_POST["password"] == "admin"){
            header("Location: admin.php");
            exit();
        }
        if(substr(strrev($_POST["username"]), -1) == "s" && $_POST["password"] ==
$_POST["username"]){
            header("Location: student.php");
            exit();
        }
        if(strrev(substr(strrev($_POST["username"]), -3)) == "emp" && $_POST["password"] ==
$_POST["username"]){
            header("Location: employee.php");
            exit();
        }
    }
?>
<h1>Login</h1>
